FROM: Cami Marsh, Marketing Communication Coordinator

Dear Omron Partners,

Thank you very much for your many kind words of encouragement that have been emailed and phoned in following the earthquake and tsunami in north-eastern Japan. The information below is about how the Omron Group has been affected and how we are and will be dealing with the situation.

We have confirmed that luckily, none of the approximately 1,200 staff members in the affected area were harmed. We are still working to confirm the safety and well-being of the relatives of Omron staff.

In addition, there has only been limited damage to offices etc. and these workplaces will all be fully operational once the condition of mass transport and electrical infrastructure has been improved.

Fortunately, Omron factories did not incur any damage as there are no Omron factories in this region. We are now currently checking all area parts suppliers.

Omron has created a special earthquake task force in order to confirm the safety and well-being of the relatives of Omron staff. We will fulfill our social responsibilities as suppliers of products and services, concentrating efforts on helping to restore infrastructure in the region through Omron's medical equipment and Social Systems Business.

We will do our best to help make the post-disaster recovery as speedy as possible. We will be coordinating with Omron regional management centers in order to share any information as it comes to hand.

For Daily updates regarding business operations, factories, shipping, etc , please visit our corporate site:

<http://www.omron.com/media/press/2011/03/c0315.html>

We will continue to update you as further communications are received and details develop.

We firmly support our OMRON family and the Japanese Relief efforts.
